

# PĀPR™

## THE EVERYTHING STICK.

# DEAR SKIN, MEET YOUR MAGIC SUPERWEAPON.

The Everything Stick is made for every part of your body that needs some extra love and attention, including your eyes, face, and lips.

Our formula is packed with a powerful blend of 7 antioxidant-rich natural oils that work in layers to generate healthy, happy, youthful-looking skin.

Vitamin E oil, shea butter, and cacao butter penetrate deep into the skin to stimulate moisturizing hydration and skin regeneration for smooth, plump skin.

And while marula, olive, and rosehip oils combat acne and stave off wrinkles, candelilla wax and jojoba oil create a luxuriously silky layer over the skin to protect it against harmful irritants.

The combination of these ingredients will leave you with a non-greasy, radiant glow.

So, whether you're looking to protect your skin from cold winds during a winter ski adventure, stay moisturized after a day of lounging on the beach, or heal everyday scrapes and cuts, this all-natural multipurpose stick has you covered.

# INGREDIENTS

## MARULA OIL

Your skin's acne-fighter.

This lightweight but powerful oil has antibacterial properties that actively combat the skin bacteria that cause acne. It also prevents skin damage and keeps your skin hydrated, soft, and moisturized.

## SHEA BUTTER

Your skin's mightiest moisturizer

This nourishing oil is a fast-acting moisturizer that quickly gives your skin a plump and hydrated look. While it works quickly to nourish your skin, shea butter also has a swiss army knife of benefits that include preventing acne, activating collagen production, soothing damaged skin, aiding in wound healing, and reducing the appearance of scars and wrinkles.

## THE SCENT

Is a gentle combination of Jasmine Flower Extract and Palmarosa Oil.

Jasmine flower extract not only has a light, enchanting floral scent but also has anti-bacterial properties and provides powerful hydration to your skin. Palmarosa oil has a subtle citrus scent and is an ancient medicinal remedy that is used to stimulate skin regeneration while combating acne by preventing the overproduction of sebum.

## JOJOBA OIL

Your skin's healer.

This soothing anti-inflammatory oil can be used to heal your skin in a variety of ways from reducing redness and preventing acne to promoting wound healing and calming eczema and rosacea. Jojoba oil also creates a lavishly smooth layer on the skin's surface that leaves it looking hydrated and nourished.

## VITAMIN E

Your skin's regenerator.

For tired, chapped-looking skin, vitamin E oil stimulates skin cell regeneration that quickly brings fresh, healthy-looking new skin to the surface. This restorative, anti-inflammatory oil also protects the skin against cellular damage and promotes wound healing.

## ROSEHIP OIL

Your skin's age-defier.

This moisturizing oil leaves your skin with a fresh, even-toned glow while fighting wrinkles, protecting against sun damage, and reducing inflammation. Meanwhile, beneath the surface, the vitamins in rosehip oil stimulate collagen production while preventing collagen breakdown giving your skin a more youthful firmness.

## CACAO BUTTER

Your skin's hydrator.

Cacao butter is like a deep moisturizing infusion for your skin. It not only improves skin elasticity and increases blood flow but also slows skin aging and smoothes scars and wrinkles.

## CANDELILLA WAX

Your skin's armor

This 100% vegan wax creates a silky, protective barrier over the skin that locks in moisture but keeps harsh environmental elements, like pollutants and UV light, at bay. Candelilla wax is also a fast-absorbing moisturizer that deeply conditions the skin for long-lasting softness.

## OLIVE OIL

Your skin's mega multitasker.

This popular, vitamin-rich oil keeps your skin looking fresh, healthy, and nourished by reducing water loss, repairing damaged skin tissue, promoting skin cell growth, protecting against skin damage, and hydrating even the most sensitive of skin.

# PACKAGING

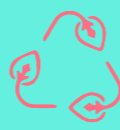

POST-CONSUMER RECYCLED PAPER

WHEN FINISHED: SIMPLY CUT INTO PIECES

POP THE TUBE INTO THE HOME COMPOST OR BURY IT IN THE SOIL OR A PLANT POT.

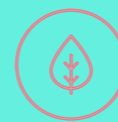

YOU CAN ALSO JUST THROW IT IN THE BLUE RECYCLING BIN.

RECYCLABLE
